

R TOP 10
**FOOD PROCESSING
 AND PACKAGING**
 TECH SOLUTION PROVIDERS - 2020

Like any other industry, the food processing and packaging sector is also undergoing unprecedented changes since the last couple of years. With digital advances driving most of these transformations, manufacturers are heavily incorporating premium technology to allure customers. To begin with, manufacturers are investing in technology-enabled solutions to produce smart labels on food packages. These patented smart labels include NFC chips or printed QR codes that can be easily scanned by using a mobile phone to gain information about the product—shelf life, the authenticity of the brand, date of manufacture, and more. Besides, smart packaging also tracks several parameters like pH, temperature, fermentation to ensure freshness, FSMA compliance with health standards information, among others. In fact, to make lives of busy consumers easier, brands are going the extra mile to provide convenient on-the-go packaging.

In addition, to increase the shelf life of these food products, manufacturers are using non-thermal technologies like high-pressure processing, pulsed-electric fields, and UV to eradicate chances of microbial growth and keep the nutrient profile high. Manufacturers have also addressed the increasing demand for sustainable solutions and are mostly resorting to paper-based packaging material that can either be recycled and reused

easily or are compostable. To that end, manufacturers are also increasing the production of functional foods that promote a healthy lifestyle. Hence, they have come with plant-based substitutes that are nutritionally enriched, yet taste good. These food alternatives are outpacing environmentally taxing animal products, thereby negating unhealthy food options.

In order to assist companies in the food processing and packaging realm in shoring up their capabilities, we have compiled this issue of Food and Beverages Tech Review. In this edition, we have listed top 10 food processing and packaging tech solutions providers 2020 to highlight the companies that can help you escalate your chances of success. Equipped with innovative technological capabilities, these enlisted solution providers are transforming the food processing and packaging landscape at the cloverleaf of various disruptive technologies. Besides, the magazine comprises insights from subject-matter experts, CIOs, and CXOs in the food and beverages sector on the latest industry trends, best practices, recent innovations, and highlights their expertise. We hope this issue of Food and Beverages Tech Review helps you build the partnership you and your organization need to foster an environment driven by robust and efficient technology.

We present to you Food and Beverages Tech Review's "Top 10 Food Processing and Packaging Tech Solution Providers 2020."

TOP 10 FOOD PROCESSING AND PACKAGING TECH SOLUTION PROVIDERS - 2020

COMPANY	DESCRIPTION
CJ Precision Machine cjprecisionmachine.com	CJ serves a wide variety of markets including the semiconductor, solar, food processing, beverage, automobile, university, hospital and many more
FOCKE & CO focke.com	The portfolio of FOCKE & CO is assigned to provide customized packaging solutions for different products for the hygiene & tissue as well for the food & consumer industry
Intralox intralox.com	Specialize in innovative technologies, including Modular Plastic Conveyor Belting, ThermoDrive® technology, DirectDrive™ Spiral Systems and Activated Roller Belt™ (ARB™) equipment
Koss Industrial, Inc. kossindustrial.com	Manufacturer of custom stainless steel equipment for cheesemaking, dairy processing, food and beverage processing, and other sanitary needs
Schenck Process schenckprocess.com	Schenck Process is the global technology and market leader in bulk material handling technologies, for Mineral Processing in Mining, Food Manufacturing, Metals Processing, Plastics and Chemical Handling, as well as production on Construction materials, such as Cement
Shuttleworth shuttleworth.com	Shuttleworth's technological expertise is revolutionizing product handling in the industry today, and their innovative Slip-Torque® roller technology is at the core of it
Solaris Biotechnology Srl. solarisbiotech.com	Solaris is a manufacturer of bioprocessing equipment specializing in bioreactors/fermentors, TFF systems, process tanks, CIP/SIP systems, ancillary equipment and much more
SupplyOne supplyone.com	Provide strong leadership and accountability in framing and driving desirable health, safety and environmental outcomes
Victory Packaging victorypackaging.com	Victory Packaging deliver innovative services and enhanced packaging processes with a cost-savings to customers makes us an industry leader
Weber weberweb.com	Weber Maschinenbau is one of the leading system providers for cold cuts and one of the most important partners for the food processing industry
